- GIT/GITHUB
- RESPONSIVE DESIGN BUILD
- TOOLS AND PACKAGE MANAGERS DEPLOYMENT
- FIREBASE

PROJECTS

E-Commerce Website

: Developed a user-friendly web application for customers to browse menus, add item to cart,place orders,user authentication using local storage.

- **Technologies Used:**
  - HTML , CSS , Material UI , Bootstrap , JavaScript , React.js , Git , LocalStorage , ContextAPI.

- **Role**
  - Designed and implemented the user interface using React.js .
  - Implemented features for user authentication using localStorage.
  - Ensured responsive design for mobile and desktop users

- **shopper00.netlify.app**

Teckiting Management

: Developed a fully functional Ticketing System using React.js and Firebase for authentication and data storage. Implemented role-based access for Customers (who can raise, view, and delete their own tickets) and Support Agents (who can view, assign, and update ticket statuses). Designed an intuitive dashboard with functionalities like ticket categorization, prioritization, and real-time status updates. Built a dynamic ticket submission form with 12+ fields, validations, and Firestore integration for seamless data management. Deployed the system on Firebase with a clean, responsive UI following industry standards.
